

A hand is shown placing a fourth block with a blue checkmark on a row of three other blocks, each also featuring a blue checkmark. The blocks are light brown and are set against a blue background.

Value Proposition Canvas Template

What is a Value Proposition Canvas?

A [value proposition canvas](#) is a concept designed by Peter J. Thomson. It is described as “a fairly simple tool that quickly gets you to the ‘minimum viable clarity’ required to start building and testing a product or service.”

This template prompts you to think about what *benefits*, *features*, and *experiences* your product or service offers to customers, as well as the *needs*, *wants*, and *fears* they experience pertaining to your product. You’ll also be prompted to identify the *substitutions* for your product or service, in addition to your *product name* and *ideal customer*.
